**SUBJECT: Letter of Recommendation  
Rockford Corporation**

To Whom It May Concern:

The Rockford Corporation has been doing mechanic contracting work for BP on our pipeline and bulk fuel terminals for the past seven years. A sample of the types of work that they have performed for us include:

- Pipeline Re-routes
- Directional drill relocations
- Mainline valve installation
- Pump station and delivery facility product containment upgrades
- Major station and terminal piping modifications
- Landslide mitigation projects
- In-line inspection dig programs
- Pipeline hydro-testing
- Pipeline damage prevention/line locating services

In all of the services that Rockford Corporation has performed for us over the years, their work has always been performed in a safe and professional manner. They manage their workforce well and have always produced high quality work for us. This makes it very easy for me to recommend them to other pipeline and terminal operators as a good contractor.

If you have any questions or would like to discuss specific work that Rockford Corporation has done for us in the past, please do not hesitate to call me at (425) 226-8881.

Sincerely,

Kurt Hayashida, P.E.  
NW & N. California Engineering Team Leader  
BP US Pipelines and Logistics
